TKSS Schools Regatta's - Drinking water

Dear Parents / Carers / Teachers

The planning for the TKSS Schools Regatta is in full swing and the Regatta Committee is committed to our efforts to help the environment, and have an ecological policy regarding the use of single use plastic bottles in place.

In the current climate many people are trying to reduce plastic waste. Charities and other organisations help educate children and adults alike about the impact of plastics on our environment, and how to go about reducing waste and recycle more.

The committee implementing our policy at the summer regatta, and will continue with the same policy for all regatta's, whereby we would like to propose that all students, and accompanying adults/teachers, parents, family members and friends, who participate in the TKSS Schools Regatta bring along a reusable water bottle. We have reusable jugs and water dispensers as well as squash available at the regatta.

As a result of this approach, the Regatta committee may or may not realise a small profit. As usual, any profits made from the regatta will be reinvested by the charity into equipment and other items that will directly benefit the students rowing at Team Keane Sculling School. We hope you agree with this approach and look forward to hearing from you confirming the same.

Yours sincerely
TKSS Schools Regatta Committee
