TKSS Schools Regatta's – Single Use Plastic Water Bottle Policy

The planning for the TKSS Schools Regatta is in full swing and the Regatta Committee are committed in our efforts to help the environment, and as a result have an environmental policy in place, regarding the use of single use plastic bottles.

In the current climate many people are trying to reduce plastic waste. Charities and other organisations, educate adults and children alike, about the impact of plastics on our environment, and how we can reduce waste, and recycle more.

We implemented the new policy at the 2018 Summer Regatta, and will continue with it, whereby we took the decision not to sell single use plastic bottles of water at any of our events. We would like to propose that all students and adults attending any Team Keane event, either as a competitor, or a spectator, brings along a reusable water bottle. This bottle can be filled and refilled from the tap, or alternatively we will also have jugs and/or a water dispenser available, as well as squash.

As a result of this approach, the Regatta committee may or may not realise a small profit. As usual, any profits made from the regatta will be reinvested by the charity into equipment and other items that will directly benefit the students rowing at Team Keane Sculling School. We hope you agree with this approach and look forward to hearing from you confirming the same.

Yours sincerely
TKSS Schools Regatta Committee
